

TT JumboPress

With its latest press section designs, Toscotec has focused on ease of operation and overall plant efficiency. It has developed a wide range of solutions to reduce or eliminate free draws, thus reducing paper breaks as well as increasing final dryness after the press section.

With press rolls with diameters up to

1500 mm and working nip loads up to 500 kN/m, the TT JumboPress can offer the optimal solution, combining lower installation costs and efficient water removal.

TT JumboPress can be installed in single or double-felted press layouts, with the shell covered with different kind of rubber, depending on

Customer's needs, polyurethane or ceramic material.

With the new hydraulic loading system and closed frame technology, it is then possible to reduce the press section investment and assure a higher dryness improving energy savings.

Benefits

- Easy of operation
- Low installation cost
- Higher dryness, higher energy savings

TT JumboPress	
Diameter	Up to 1850 mm
Linear Nip load	Up to 500 kN/m
Loading system	Hydraulic
Felt layout	Single or double felted
Shell cover	Rubber, polyurethane or ceramic
Frame load scheme	Closed or open
