

TT RopeTail

Mature solution to thread the tail in the dry end, TT RopeTail is the result of year of experience in the field. Ropes and sheaves are accurately studied in geometry of the incoming closing rope nip, as well as outgoing opening one, the combination of

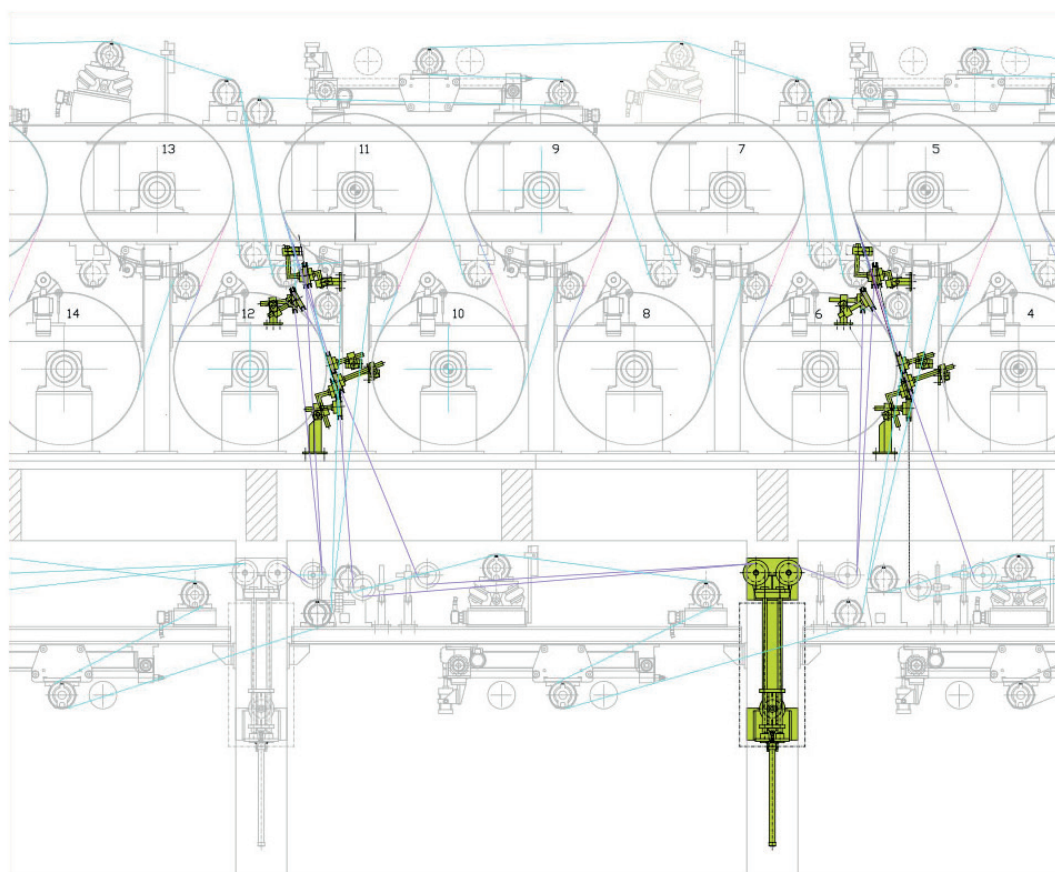

which leads to a robust tail threading system.

Rope tensioning control and use of rolls idle pulley, results in a minimal wear and rope maintenance.

Full mechanical adjustment is part of the design, so to create the best

fitting of the parts to any paper machine.

Additional equipment as for example the independent rope drive can be included in the scope of supply.
