

## TT SizePress

Toscotec TT SizePress is designed to optimize starch and sizing agent in the paper web.

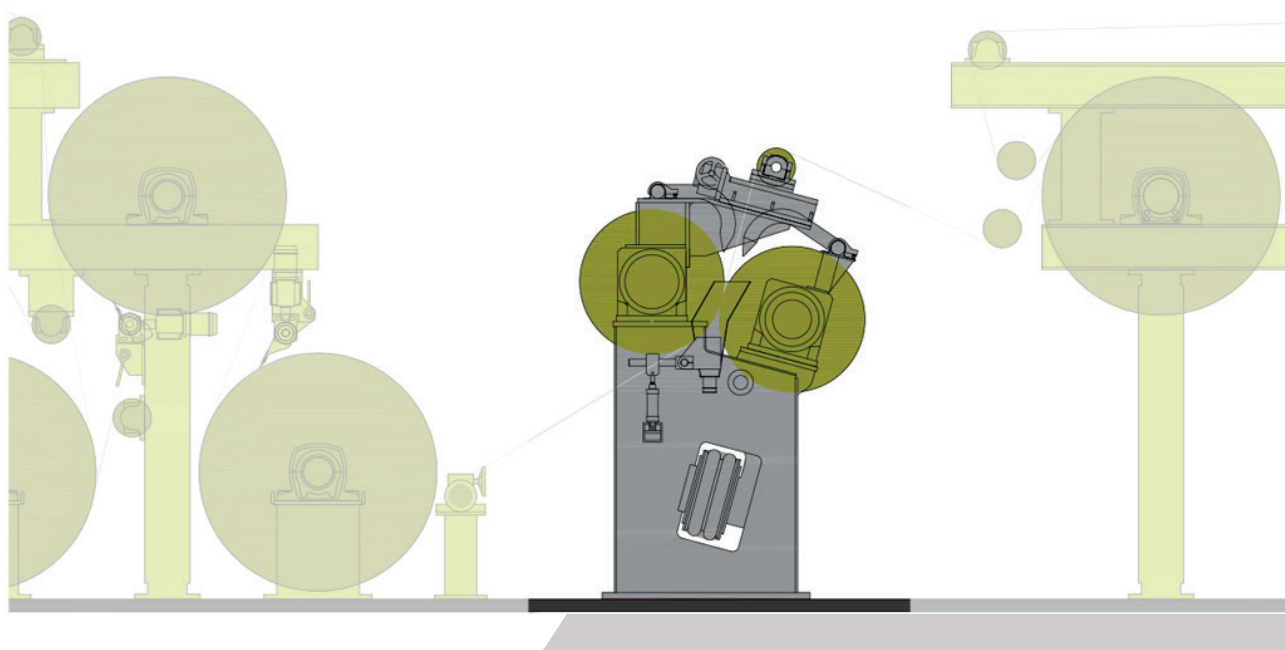

Great care is been used in designing the pond area, both in terms of starch feeding, via a dedicated header and distributor, than edge overflow and starch recovery; the result is a good penetration and an even sizing effect

in cross machine direction.

Pneumatic or hydraulic loading system is used as a standard in order to minimize vibrations effect in the nip.

Rolls used in TT SizePress are covered using the most appropriate selection of covering material, depending on peculiar Customer's needs.

For packaging paper is used for coloring the liner grades and mainly for strength improvement (SCT, CMT, burst and internal ply bond); In board grades application it's used for dusting reduction, color hold out, backside treatment and improve the bending stiffness.
